Announcing

ARBOR SCAN™

Allows You to "SEE" Inside Trees
Its Like Having X-Ray Vision

Using advanced Surface Penetrating Radar Work Smart, Inc. can scan any tree giving you an internal view similar to a medical CT scan. Allowing the Arborist to make accurate decisions on treatment or risk assessment. This well established technology will allow a never before available insight of many internal tree problems. Multiple scans allow for full length views without drilling or otherwise further damaging the tree.

ARBOR SCAN™

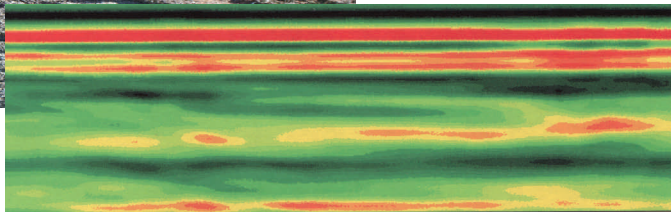

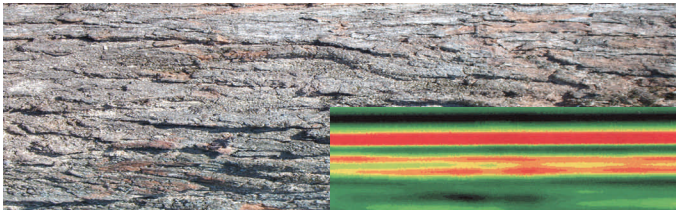

Allows You to “SEE” Inside Trees
Its Like Having X-Ray Vision

(1) Healthy Tree Scan

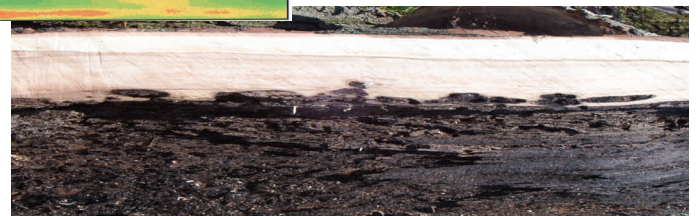

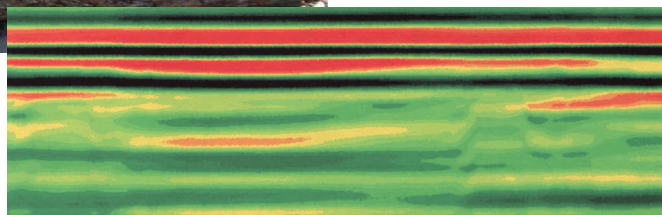

Our experienced technicians are well trained in the interpretation of Surface Penetrating Radar data. Easily analyzing these actual scans as (1) healthy tree cells, (2) a hollow void inside the trunk or (3) even small pockets of potential infestations.

(2) Void Scan

(3) Infestation Scan

No trees were damaged in the making of this brochure or the testing of this equipment.
